*The Start/Stop system is designed to reduce fuel consumption and CO ₂ emissions. It achieves this by automatically switching off the engine while the vehicle is stationary and then starting it again automatically when the driver wants to drive off. There are certain operating conditions where the Start/Stop system is deactivated (e.g. during engine warm-up), please refer to the owner's manual for full operating information.		
**The figures stated are for the purposes of comparison amongst vehicles tested under the same testing procedures only. The actual figure may vary depending on multiple factors such as fuel quality, vehicle load, environmental and road conditions.		
***Fuel consumption figures according to ADR 81/02 derived from laboratory testing. Factors including but not limited to driving style, road and traffic conditions, environmental influences, vehicle condition and accessories fitted, will in practice in the real world lead to figures which generally differ from those advertised. Advertised figures are meant for comparison amongst vehicles only.
