Welcome

Škoda is one of the world's oldest automobile companies.

We've been building award-winning cars for over 120 years and your willingness to look a little further and research a little deeper, has led you to a car fuelled by innovation, creativity, and is fundamentally 'Big on the little things'. No matter which Škoda you drive out of the showroom, you can be sure there's an inventive spirit at the heart of every model.

By purchasing a Škoda you can join millions of motorists from right around the globe who enjoy the quality, reliability, and safety that defines one of Europe's fastest growing car brands.

As part of the Škoda family, you're part of something big.

Let's Explore.

Heritage

The Škoda story began with a bicycle called the 'Slavia'.

It was built by our founders, Václav Laurin and Václav Klement, in 1895 when they couldn't find a bike that suited their needs. The two friends next turned their inventive minds to producing record-breaking motorcycles and then, just ten years after the 'Slavia', their first car – the Voiturette A – rolled off the production line.

In 1925, Laurin and Klement merged their company with Škoda Works and went on to achieve breakthrough success with the Škoda Popular in the 1930s. For the next sixty years, from our reliable early models and beyond, Škoda has continually built cars of the highest quality. Its integration with the Volkswagen Group in 1991 only helped reinforce the brand's roots, and a continuation of the inventive spirit that began over 130 years ago.

Škoda eMobility

The new era of mobility is electrified. We're developing a futuristic vision for eMobility that is universal as it is forward thinking. We strongly believe that eMobility will completely change the experience of driving a car, and we are committed to ensuring the accessibility of this revolution for all people. Welcome to the new era of eMobility at Škoda.

It is our mission to democratise the eMobility revolution, to render it accessible while delivering the same compelling value our customers expect. We believe in eMobility for everyone, and as such,

we're making it as welcoming as possible for people to get started through the introduction of On EV.

On EV makes electric vehicle ownership easier, managing the ongoing costs of driving an electric vehicle more flexible, and makes living with an electric vehicle a better experience overall. On EV provides assurance to owners of Škoda electric vehicles that their EV is better built, better backed, and better value than other electric vehicles across Australia.

Innovation

When our designers start thinking about creating a new car, they begin by thinking about the people, like you, who are going to drive that car.

Our goal with every model is to develop innovative technology that delivers genuine human benefits. For us, this means safety, spaciousness, flexibility, practicality, comfort, modernity, and connectivity. When we achieve this, we believe we've done our job, because it allows our customers to just simply enjoy their journey.

Connectivity

Wireless Smartphone Connectivity¹

Combining our smart car with your smartphone was always going to be a good idea. With wireless Apple CarPlay® and wireless Android Auto™, you can seamlessly connect your compatible apps from your smartphone to your Škoda. So, whether you want to listen to music or receive turn-by-turn directions, you can do it all without touching your phone.

Wireless Charging

No cables, no worries. With Qi Wireless charging, you'll never get caught with a flat smartphone when you're on the go.

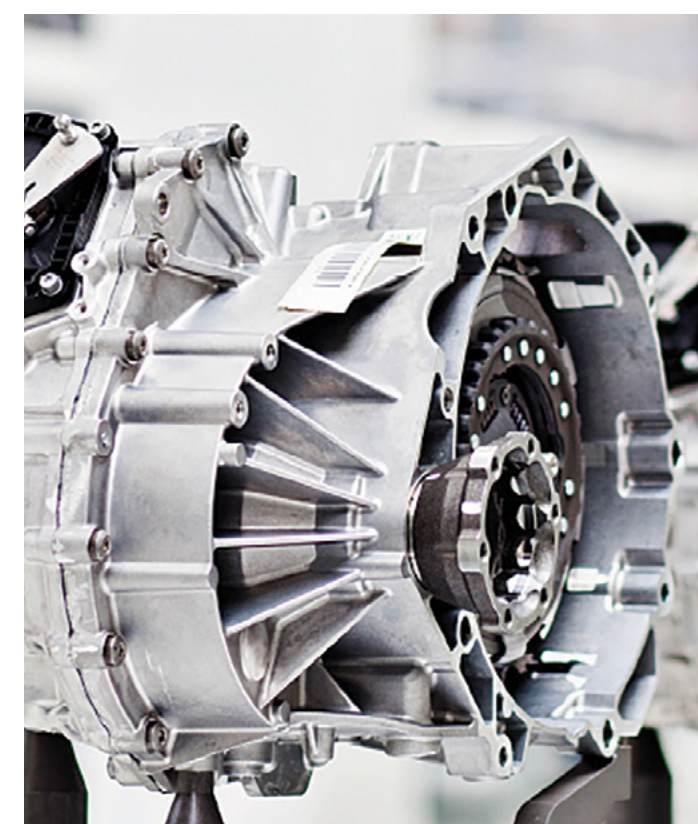

¹. Wireless Apple CarPlay® and Android Auto™ is compatible with the latest versions of iOS and Android, active data service required.

Design

Crystalline Design

The original Škoda DNA has been enriched with crystalline structures, drawing on the tradition of Czech crystal art symbolising sharpness and precision. Crystalline design is a key element in Škoda's striking current design language and will characterise the brand's style in the future.

Transmission

Originally developed for Porsche racing vehicles, Škoda's DSG dual-clutch transmission system is a unique feature.

Technology

Convenience Key²

Even the doors are smart. With the convenience key, you can lock/unlock your car and start or stop the engine without the need of physically touching your key.

Virtual Cockpit²

An advanced digital display that takes the place of traditional dials, gauges and sub-screens, improving the way drivers interact with both their car and the road.

Adaptive Cruise Control²

Just when you thought cruise control couldn't get any smarter. Adaptive Cruise Control features a radar sensor on the front grille which monitors the vehicle(s) ahead, allowing it to automatically brake and accelerate to a speed and distance set by you.

Park Assist²

Parking doesn't get any easier than this. With the press of a button, Park Assist will search for a parking space and steers itself in while you simply control the pedals.

². Safety technologies are designed to assist the driver, but should not be used as a substitute for safe driving practices.

A woman with long, wavy red hair is shown in profile, looking out of a car window. She is wearing large, round, light green sunglasses and a thick, textured purple sweater. Her hand is resting near her chin, and she is wearing a ring. The background outside the window is blurred, showing a bright, sunny day.[Back to Contents](#)

Smart Features

Being smart is part of our DNA and the beauty of functionality is at the heart of every Škoda.

It's why in the boot and you'll find storage nets and when you're looking for somewhere to put special items, you'll find lots of handy pockets.

Then there's smart details like a waste bin and parking ticket holder. Plus, across selected models there's a host of features to make life easier, like luggage hooks, door edge protection, an umbrella in a door, a tablet holder, rear seat release and a virtual pedal for when your arms are full of shopping.

Safety

Exceptionally safe, no exceptions.

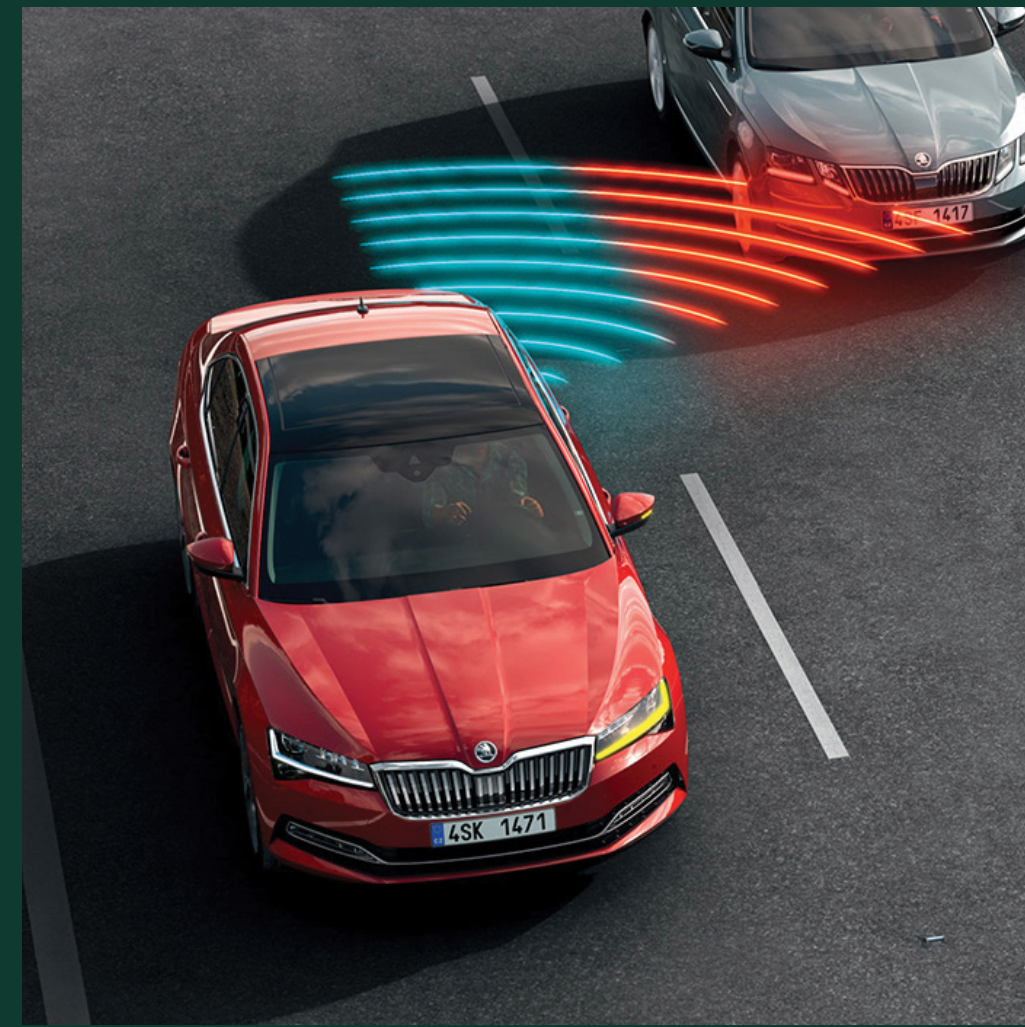

Whether you're on the school run or on a weekend away, your Škoda provides you with multiple sophisticated technologies to assist you in many unexpected situations.

A range of available technologies², such as Fatigue Detection and Front Assist with City Emergency Brake, can provide even more peace of mind. Fatigue Detection monitors your movements through the steering wheel, sensing signs of fatigue. Meanwhile, Front Assist with City Emergency Brake uses a radar sensor to gauge risks ahead and even brake on its own to help avoid collisions.

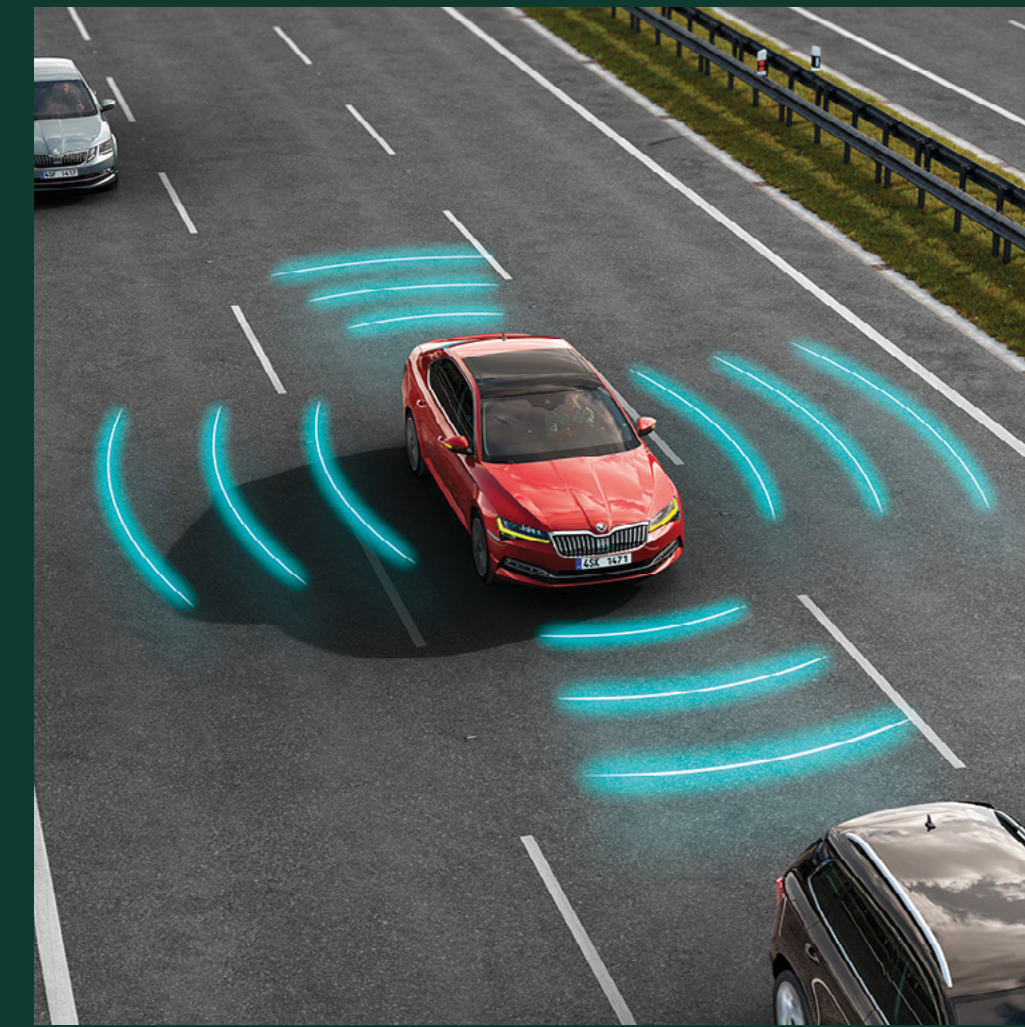

²Safety technologies are designed to assist the driver, but should not be used as a substitute for safe driving practices.

Tour de France

The Škoda story began on two wheels, not four. This heritage is why Škoda has proudly served as the official partner and car supplier of the Tour de France since 2004. With a deep-rooted commitment to the cycling community, Škoda continues to champion values of connection, resilience, and positivity - especially in challenging times. Škoda provides vehicles that will provide essential neutral assistance to riders, offering everything from spare tyres to emergency aid.

Škoda's enduring partnership with the Tour de France reflects its unwavering support for the global cycling community, honouring a legacy that started on two wheels and continues to inspire millions worldwide.

credit: ASO Billy Ceusters

Production Plant

Our founders Václav Laurin and Václav Klement set up their first factory in Mlada Boleslav, Czech Republic. Here, 40 employees first built motor assisted pedal bikes, then motorbikes, and from 1905, cars. Since that day millions of vehicles have followed that very first Voiturette A off the assembly line.

The company's registered office and automobile development department have remained here in an innovative, award-winning structure. Over time we have also grown and spread our production to many other cities as well.

Škoda Choice³²

Škoda Choice³² is our Guaranteed Future Value program – a flexible finance solution that provides you with the assurance of knowing exactly what the minimum value of your vehicle will be at the end of your loan term, and gives you the option to trade in, retain or return your vehicle. The choice really is yours.

³²Škoda Choice has a Guaranteed Future Value (GFV) which is the minimum value of your vehicle at the end of your finance contract as determined by Škoda Financial Services (SFS) ABN 20 097 071 460, Australian Credit Licence 389 344. If you decide to return your vehicle to SFS at the end of your term, SFS will pay you the agreed GFV, which will be put against your final payment subject to fair wear and tear conditions and agreed kilometres being met. At the end of your term, you can elect to (1) trade-in; (2) return; or (3) retain the vehicle by paying the GFV owed to SFS at the end of the loan term after all repayments have been made. ±You will be liable for any loan contract deficit and additional charges apply if you exceed the nominated kilometre allowance and/or the vehicle is not in an acceptable condition. Available on new, demonstrator or Certified Pre-Owned vehicles for selected Škoda models. Contact your nearest Škoda dealer to check eligible vehicles for this program. To see if this product is right for you, please see our Target Market Determination on our website and/or seek independent advice. *Subject to a credit assessment and SFS lending criteria. Fleet, government, rental buyers, hire car and chauffeur companies excluded from GFV.

Škoda Roadside Assistance⁴⁶

With every Scheduled Service performed for your new Škoda at an authorised Škoda dealer, you will receive up to 12 months for petrol and diesel vehicles and up to 24 months for electric vehicles of Service Initiated Roadside Assistance (SIRA) membership commencing from the date of the Scheduled Service.

⁴⁶Service Initiated Roadside Assistance (SIRA) can take up to 48 hours to be applied to your vehicle. SIRA membership is provided by 365 Assistance Pty Ltd ABN 59 160 076 200 trading as '365 Assistance' ('365'). Whenever you request roadside vehicle assistance under your SIRA membership, you will be making that request to 365 Assistance, who will provide the services on the terms and conditions available at <https://www.skoda.com.au/own/roadside-assistance>. The terms and conditions contain exclusions and limitations.

Škoda Service Packs³³

Why deal with the hassle of paying for your servicing every time you need it? Instead, save time - and money - by pre-paying it. The most cost-effective way to service your petrol or diesel Škoda vehicle is by purchasing a 7-Year Service Pack, or an 8-Year or 10-Year Service Pack for Škoda electric vehicles.

These packs give you the flexibility to service at any of our authorised Škoda Dealers across Australia and come with the added benefit of roadside assistance.

If you've not already taken up this great offer, your local dealer can assist you in adding a service pack to your vehicle right up until its first service.

³³ Škoda Service Packs are available from authorised Škoda Dealers or online from Škoda Australia official website, for all models and covers standard items as contained in each scheduled service interval only. The New Car Service Packs can only be purchased prior to the first scheduled service and up to 15,000 km/12 months (whichever occurs first) for petrol and diesel vehicles, and up to 30,000 km/24 months (whichever occurs first) for electric vehicles. The timeframe takes effect from the start of the Škoda New Vehicle Warranty Start Date. The Used Car Service Packs can be purchased after the first 15,000 km/12 months scheduled service. The Top-up Service packs can be purchased based on the eligibility criteria as detailed in the terms and conditions. Discount structure varies by model. For details of what is not included in a scheduled service, please refer to the program terms and conditions available at <https://bit.ly/skodaservicepacks>.

7 Year/Unlimited Kilometre Warranty[^]

Your Škoda can cover a lot of kilometres in seven years and we're proud to stand behind it for every single one. Our 7 Year/Unlimited Kilometre Warranty[^] shows the great confidence we have in the quality of our vehicles and it's our commitment to your peace of mind.

[^] 7 Year/Unlimited Kilometre Warranty is available with private, general fleet and government vehicles only. Excludes rental vehicles, hire cars, taxis, courier vehicles, driving school vehicles, security vehicles, bus and tour vehicles which are subject to a 7 Year/150,000 Kilometre Warranty. Warranty on demonstrator vehicles only applies for the balance of the 7-year term. Warranties are provided in addition to, and in some cases overlap with, consumer guarantees under Australian Consumer Law and do not limit or replace them.

Škoda Choice Guaranteed Future Value³²

Trade In

Speak to your preferred Škoda dealer about your trade-in options. If the trade-in value is higher than the Guaranteed Future Value³² (GFV), you can use this equity towards your new Škoda.

Retain

If you'd like to enjoy your Škoda for longer, you can payout or refinance* the GFV³² amount.

Return

Return your vehicle to your preferred Škoda dealer. Provided it meets the kilometre and fair wear and tear requirements[‡], you'll have no more to pay.

Škoda Choice³² is our Guaranteed Future Value program – a flexible finance solution that provides you with the assurance of knowing exactly what the minimum value of your vehicle will be at the end of your loan term, and gives you the option to trade in, retain or return your vehicle. The choice really is yours.

Available on new, demonstrator and Certified Pre-Owned Škoda vehicles.

³²Škoda Choice has a Guaranteed Future Value (GFV) which is the minimum value of your vehicle at the end of your finance contract as determined by Škoda Financial Services (SFS) ABN 20 097 071 460, Australian Credit Licence 389 344. If you decide to return your vehicle to SFS at the end of your term, SFS will pay you the agreed GFV, which will be put against your final payment subject to fair wear and tear conditions and agreed kilometres being met. At the end of your term, you can elect to (1) trade-in; (2) return; or (3) retain the vehicle by paying the GFV owed to SFS at the end of the loan term after all repayments have been made. [‡]You will be liable for any loan contract deficit and additional charges apply if you exceed the nominated kilometre allowance and/or the vehicle is not in an acceptable condition.
